2/26/64, invisible file, Serial 2480, on 2/25/64 review of Zap, Nix and Muchmore with Commission and Orth. Shaneyfelt drafted this for Griffith's signature. His concetp of criminal investigationis abundantly clear in "...the time interval between the shots. It is not clear what purpose this will serve in the Commission's investigation." Naturally it would not help to establish that there was less time between two shots than would enable the reloading, reaiming and firing of the sinlg rifle. Naturally also with Life making the slides and giving them free to the government, via the FBI, there was no request for all of them.

Hoover approved the recommendation that they make a study and report on the slides, Z. film. If we do not have would be worthwhile getting. The omissions will be gross.

Of such is the Hooverite kingdon. File Shaneyfelt.
